

As a small market radio station owner, I am strongly opposed to the possibility that we may be required to record and save any or all of our broadcast day for possible government review. The issues with this proposed ruling are many, including:

- The expense of purchase and installing the necessary recording equipment from 6 am - 10 pm
- The technical and staffing burden to ensure the equipment is operating properly
- The punitive attach against all stations for the indiscretions of a few
- The Public Interest is served by programming - not by forced recording of such programming.
- The Commission is shifting the burden of enforcement to the licensees and Possibly some First Amendment infringement.

Please seriously consider this issue intrusive and abusive to the small market owner, who takes his/her service to the community very seriously. We do not need more government control over our business.

Thank you.
